Big Blue Inline filter housing for demanding applications

- for installations requiring high flow rates
- two O-rings ensuring a tight, leak-proof connection
- resistant to selected chemical substances

The Big Blue water filter housing is an excellent solution for installations that require high performance. Thanks to the use of two O-rings, the filter provides reliable sealing, eliminating the risk of leaks. Made from materials resistant to selected chemical substances, it is an ideal choice for demanding conditions, ensuring long-lasting filtration efficiency. Perfect for industrial applications and anywhere high performance and reliability are essential.

Technical data

Symbol	WF10BB1-2	WF10BB64-2	WF20BB1-2	WF20BB11/2-2
Size	10" BB		20" BB	
Connection	1"	1 ^{1/2} "	1"	1 ^{1/2} "
Operating temp.	4-38 °C			
Max operating pressure	6 bar			
Height (cm)	19,5		32	
Width (cm)	10		10
