## WATER SOFTENER

Working  
without  
electricity

Low water  
consumption 25 l  
for regeneration

**ECO**

Low salt  
consumption  
0,35 kg  
for regeneration

**ECO**

- Water softener working without electricity
- The most economical in operation of this type of devices
- Very low water consumption for regeneration of 25 l
- Very low salt consumption - about 0.35 kg for regeneration
- Small dimensions enabling development in small areas
- Includes a bypass and output water hardness regulator
- Modern look combined with a solid structure

Symbol	TØREN
Type	Compact
Nominal flow	2,1 m <sup>3</sup> /h
Resin volume	10,5 l
Exchange capacity	14° dH x m3
Avg water consumption for regeneration	25 l *
Avg salt consumption for regeneration	0,36 kg
Salt tank capacity	10 kg
Dimensions (w/d/h)	36/36/68 cm
Vessel tank dimensions (i/h)	8" / 17"
Weight	15 kg
Power supply, voltage	Lack
Working temperature	2-35 °C
Working pressure	2-8 bar
Connection	3/4"
Supply water temperature	2-35 °C

\* Depending on the pressure of the water.
