

In-line cartridges PLUS

**Antibacterial
effect**

**Extended filter
life up to 9 mths**

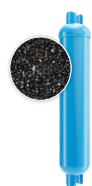

**Quick and easy
installation**

**Enriches the reverse
osmosis system**

Description of cartridges

In-line granulated activated carbon cartridge - L-GAC PLUS

- The activated carbon bed made from coconut shells effectively removes chlorine and organic compounds, improving the overall water quality.
- Thanks to its high adsorption capacity, it significantly improves taste and aroma, eliminating unpleasant odours.

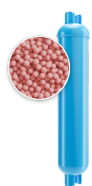

Bacteriostatic in-line cartridge - L-GAC NS PLUS

- It is equipped with activated carbon with silver, which effectively protects and removes impurities and chlorine.
- The filter provides double antibacterial protection thanks to the use of activated carbon with silver and an antibacterial casing.

In-line mineralizing cartridge - L-MIN PLUS

- It significantly mineralises water, supplementing it with natural mineral compounds that improve its quality and support the proper functioning of the body.
- It increases the pH of water, making it more alkaline, which helps alleviate symptoms of hyperacidity and improves digestive comfort.

In-line mineralizing cartridge - L-VITA PLUS

- It mineralises water, supplementing it with natural mineral compounds, thereby improving the quality and clarity of the water.
- The water flows through the beads evenly, allowing the minerals to dissolve in a consistent and uniform manner.

In-line mineralizing-alkalizing-ionizing cartridge - L-YOUNG PLUS

- It lowers ORP to -400 mV, giving water strong antioxidant properties that delay ageing processes and protect against free radicals.
- It mineralises and alkalises water, enriching it with essential minerals and supporting the body's acid-base balance. Recommended especially for people with various health conditions.

use in the RO IZZI PLUS system
