

# WF NEUTRA

## NEUTRALIZING FILTER FOR WATER BOILERS

**The product is designed to neutralize the acidic reaction of the condensate from gas boilers.**

- Has a positive effect on the natural environment,
- Protects beneficial bacteria in home sewage treatment plants, improving their quality,
- It does not interfere with the operation of the boiler or the discharge of condensate from it,
- Suitable for all types of boilers up to 35 kW,
- Protects sewage pipes against corrosion,
- Ensures constant quality of work during the entire life of the filter,
- Possibility of vertical or horizontal installation,
- Extends the service life of the sewage system,
- It does not restrict the flow of condensate or air through the drain pipe, making it compatible with both continuous and periodic condensate drainage modes,
- Protects against limescale

SYMBOL	WF NEUTRA
Maximum boiler power	35 kW
Maximum flow	3 l/h
Condensate ph before neutralization	From 1 to 5
Condensate ph after neutralization	More than 8
Connection method	3/4" M / F connector, 3/4" F thread or 20 mm hose stubs
Flow type	Gravity flow
Service life	6 - 12 months
Length with fittings	235 mm
External diameter	60 mm
