Technology works for you

RO6 YOUNG REVERSE OSMOSIS SYSTEM

AN ALTERNATIVE TO BOTTLED WATER

1L of osmotic water = 0,07 USD

- six-stage filtration
- contains L-YOUNG alkalizing, mineralizing and ionizing cartridge
- cost-saving and eco-friendly
- efficient and effective
- removes up to 98% of contaminants from filtered water
- ideal taste and flavour of food and beverages
- compatible with most cartridges on the market
- quick-connectors allows fast and simple cartridge replacement
- BPA free

THIS PAYS OFF!

Reverse osmosis systems are the most frequently selected and installed kitchen filters. They purify water by eliminating sediments, heavy metals, bacteria and viruses. They provide an opportunity to drink a crystal clear, healthy water with the characteristics of spring water. They are mostly installed in a cabinet under the kitchen sink.

RO6 YOUNG system contains L-YOUNG cartridge

ORP -400
lowers ORP of water

decelerates aging process

mineralizes water

„Balance in our body is essential to maintain *full health, well-being and radiant appearance*. However pollution, processed food, stress disturb this balance. By providing natural, alkalizing minerals, one can effectively compensate the pH of the body. *Alkaline water* neutralizes free radicals and decelerates aging process, increases immunity and supports the fight against civilization diseases. By replacing various supplements it allows to achieve harmony and good psychophysical condition.”

I have, I use, I recommend! !

Technical data

symbol	RO6 12 EMI YOUNG RO6 34 EMI YOUNG RO6 38 EMI YOUNG	RO6 12 WFU YOUNG RO6 34 WFU YOUNG RO6 38 WFU YOUNG
connection	1/2", 3/4", 3/8"	
working temperature	2-30 °C	
working pressure	2.8-6 bar	
efficiency	75 GPD	
dim. (H/W./D) cm	47 x 43 x 14	

BPA free

„food safe”
product

ProAge
series

The system contains

Pre-filters:

- **sediment (P55 and P520)** made of polypropylene non-woven fabric removes from water mechanical contaminants such as sand, rust, carbon fines and other sediments.
- **treatment (BL)** from sintered activated carbon. It improves taste and flavor of water by removing chlorine and its derivatives.

RO membrane (TLC 75)

- removes microorganism and even ions. It is made of multiple layers of semipermeable, porous membrane. Its pores are large enough to let water penetrate through them, yet small enough to prevent other substances from passing through. An efficient RO membrane is capable of producing 280 liters of pure water per 24 hrs.

In-line cartridges:

- **carbon (L-GAC-Q)** contains high quality coconut shell activated carbon. Extremely efficient in removing unwanted contaminants from water (chlorine, organics) and improving its taste and smell.
- **alkalizing-ionizing-mineralizing cartridge (L-YOUNG)** contains a mixture of contains a mixture of high quality ceramic balls of natural origin. Appropriate mixture of media has three functions, i.e. alkalizes, mineralizes and ionizes treated water. Consumption of such water has beneficial influence on our health. L-YOUNG lowers ORP of water down to -400 mV making it highly antioxidant and decelerates the aging process, protects from free radicals and deacidifies the body. It increases immune system function, mineralizes water and enriches it with calcium, magnesium, sodium, potassium, selenium, iron, etc.

Tank:

- bladder tank for storing filtered water.

Faucet:

- two-way faucet allowing supplementation of two types of water, i.e. osmotic water (for cooking) and mineralized (for direct consumption).

The set contains: RO system, faucet, tank, a set of connectors, installation manual.
