

WATER SOFTENER FUTURA

A modern softener with innovative “up-flow” regeneration. It consumes less energy, water and salt than a standard softener . Simple operation together with high efficiency make it a perfect solution for houses, eateries, hotels or service centers.

This softener has a futuristic design and solid durable construction. It works very quietly and has an intuitive, easy to use LCD display. Thanks to all those features FUTURA is really a user-friendly softener.

SAVINGS-MORE THAN 30%

- futuristic design
 - huge savings of operating costs – (more than 30% of salt and water)
 - extended lifetime of resin
 - reduced waste water volume
 - up-flow regeneration
 - user-friendly display LCD
- (English menu)

reduces water hardness

devices protection
against scale

increased efficiency
of chemicals

extended service
life of household
appliances

TECHNICAL DATA

Catalogue No.	WS-25-C-85SE
Type	Futura - compact
Maximum flow	2,3 m³/h
Nominal flow	1,6 m³/h
Resin volume	25 l
Exchange capacity	71° dH x m³
Average water consumption for regeneration	140 l
Average salt consumption for regeneration	1,8 kg
Dimensions (W/D/H)	30 / 52 / 111 cm
Tank dimensions (OD/H)	10" / 35"
Weight	33,5 kg
Working pressure	3 – 5,5 bar
Working temperature	4 – 30 (°C)
Power supply, voltage	AC 220 - 240 V; 12 V (650 mA)
Power consumption	5 W (during regeneration mode only)
Connection	1"

* depends on water hardness

CONNECTION SCHEME

remember

In order to protect the softener against water contamination from the water pipe, we recommend to install a pre-filter WFW EMI with meltblown PS or yarn PP cartridge.

Filter housings WFW EMI are equipped with pressure release button and brass inserts. We offer them with mounting plate and wrench in a three connection sizes: 1/2", 3/4", 1".
